* will not rot, mildew, or support the growth of bacterial and is non-allergenic

Guidance:

- Always apply any cleaning methods to a small area first to test effectiveness and result.
- Always use a minimal amount of cleaning solution and use a damp cloth to remove any excess soap or cleaning solution; otherwise, it will collect dust and dirt.
 - Soap - 5% soap to water ratio
 - Bleach - 10:1 water-to-bleach dilution ratio
 - Alcohol - Composed of two water-soluble chemical compounds, ethyl alcohol and isopropyl alcohol. They should have a concentration of between 60% to 90% in order to be an effective low-level disinfectant.
- We find that Mr Clean Magic Eraser Pads work really well on most coverings, but requires testing prior to full use.
- When in doubt...don't!

Proprietary Stain Repellent and Protections

Stain Repellent	Mold & Bacteria Protection
<p>Stain Guard – non-branded soil and stain repellent. It provides excellent repellency to oil and water and helps repel spills and makes clean up easier. Utilizes C6 chemistry.</p>	<p>Crypton® Green - offers permanent stain, moisture, mildew, bacteria and odor-resistant protection by encapsulating each fiber while utilizing Green chemistry with ultra-low emissions. Resistance to Bacterial Growth (ISO 20743) • Odor Resistance Resistance to Fungal Growth (AATCC 30) • Uses Silver Ion Technology; does not utilize leaching antimicrobials</p>
<p>TEFLON™ - branded soil and stain repellent. It provides excellent repellency to oil and water and helps repel spills and makes clean up easier. Utilizes C6 chemistry.</p>	
<p>CryptonWALL – Third-party GREENGUARD Gold Certified • Free of potentially harmful levels of PFOS, PFOA, formaldehyde, • heavy metals, phenols, phthalates, odor, and skin sensitizers.</p>
